SUMMARY

As a passionate tech enthusiast and a student of Tech, I am driven to explore and embrace emerging technologies. Eager to stay at the forefront of trends, I actively update my skill set and venture into diverse areas.

TECHNICAL SKILLS

- **Programming Languages** – Javascript, Java
 - **Web Development** – HTML5, CSS3, Tailwind CSS, Responsive Web Design, Material UI, Styled Components, Bootstrap
 - **Frontend Frameworks/Libraries** – ReactJs , AngularJS (Familiarity) ,
 - **Backend Development** – Spring boot, Node.js, RESTful API Integration, Supabase, SQL
 - **Version Control & Project Management** – Git Version Control, GitHub, JIRA
 - **Additional Skills** – Object Oriented Programming, UI Design, Linux, SEO, SMM
-

WORK EXPERIENCE

Full stack Engineer , Remote - Bright forge Solutions

March 2024 – Present

As a Full Stack Developer, I have been actively involved in our project's backend and front-end development. My key responsibilities and achievements include:

- **Backend Development** --> Created microservices and REST APIs from scratch using Java and Spring Boot, ensuring robust and scalable solutions.
- **Frontend Development** --> Worked extensively with Angular to develop and enhance the user interface, providing a seamless user experience.
- **Project Management** --> Utilized Jira to create tasks, and track progress, contributing to efficient project execution.
- **Full Stack Integration** --> Collaborated across the stack, integrating backend services with the front end to deliver cohesive and functional features.
- **Continuous Improvement** --> Focused on optimizing code and improving system performance, ensuring high-quality deliverables.
- This internship has provided me with comprehensive experience in full-stack development, enhancing my skills in Java, Angular, Spring Boot, and agile methodologies.

Web developer, Intern, Remote - Pepcoding

August 2022 – Nov 2022

During my 4-month internship, I gained hands-on experience in web development, with a special focus on designing websites using React.js.

Key Responsibilities:

- Collaborated with the design and development teams to improve the UI of the Pepcoding website.
- Implemented new features and functionalities using React.js.
- Conducted usability testing and incorporated feedback to optimize the user experience.
- Ensured the website was responsive and provided a seamless experience across various devices.

Key Achievements:

- Completed all assigned projects within the stipulated deadlines.
 - Received positive feedback for my ability to quickly learn and apply new technologies.
 - Improved UI of pepcoding Website
-

PROJECTS

The-Wild-Oasis:

- Project Overview 🏠 The Wild Oasis is an application designed for hotel employees to manage cabins, bookings, and guest information efficiently. The application ensures that only authorized hotel employees can create accounts, upload avatars, and perform various tasks related to cabin and booking management.
- CRUD OPERATIONS , HTML, CSS, JavaScript, React.js, supabase, Routing, Styled Components, React Query UI State Management: Context API Form Management ETC...

Worldwise:

- Technologies Used HTML CSS JavaScript React.js Vite Advanced React Routing Context API Custom Hooks for Reusability Leaflet for Map Integration
- Interactive World Map: Click anywhere on the map to dynamically reveal a form with the corresponding country and city, allowing you to add it to your travel list.
- Manage Countries and Cities: Add, delete, and edit countries and cities. Keep track of your favorite destinations.
- Add Notes: Document your wonderful experiences by adding notes to each city. Driver drowsiness system with energy level monitoring

UsePopcorn:

- Tech Stack 🌀 HTML, CSS, JS: The classics that lay the foundation for seamless user experiences. React.js: Powering our app with the magic of components and dynamic updates.
- Search Cinema: Dive into the cinematic cosmos! Use the search bar to fetch movies and witness a galaxy of options.
- Have learned & used advanced concepts of react js like useReducer , custom hooks etc.

EDUCATION

Bachelor of Computer Application, Aki's Poona College of Arts, Science & Commerce Pune 2020 - 2023

- CGPA - **8.77**

Courses & Certifications

- Web Development & Data Structures from pepcoding private limited
- Build Responsive Real-World Websites with HTML and CSS – UDEMY
- The Ultimate React Course 2024: React, Redux & More – UDEMY
- OOPs in JAVA from haris infotech
- Digital Marketing from school of digital marketing

ACTIVITIES AND CONTRIBUTION

United Club of Cricket - Best batsman of the tournament
